DETAILED ACTION

Allowable Subject Matter

Claim 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 8, 14, 16, 20 with the allowable feature being; at least one support element arranged between them the fixing elements. each of said at least one support element being provided with a contact element adapted to provide a correction to an adjusting device. the position of said at least one support element relative to the fixing(claim 1); clamping direction. the fixing elements are being adapted to be acted upon in a clamping direction by several clamping devices(claim 8); at least one support element abutting on one another with respective polished surfaces(claim 14, 16); one of the optical components is being arranged on one fixing element and the other on at least one support element, said optical components being adjustable relative to one another(claim 20). Therefore claim 1-20 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
